

HAN ZHANG

GAME DEVELOPER

SUMMARY

Game developer who builds gameplay systems end to end: player controllers, AI, inventory and interaction systems, real-time multiplayer, and the architecture that keeps them maintainable as a project grows. Experienced in Unity and C# across a studio co-op and multiple shipped team projects, with Unreal and C++ in the toolkit, plus editor tooling in Python and C#. Comfortable owning a system from prototype to production and debugging it under deadline.

SKILLS

- C# (Unity)
- C++ (Unreal)
- Python
- Gameplay Systems & Mechanics
- Multiplayer & Networked Gameplay
- AI & State Machines
- PlayFab Backend Services
- VR / XR Development
- Editor Tools & Pipeline Scripting
- Testing & Debugging
- Git & Revision Control
- Azure DevOps

WORK EXPERIENCE

Lead Developer (Co-op) | Jan – Apr 2026

Crossworld Chronicles • Coal Car Studio Ltd.

- Built core gameplay systems, real-time multiplayer, and XR interactions for a cooperative VR vertical slice in Unity
- Integrated PlayFab for player accounts and persistent data, connecting the game to backend services
- Used Scriptable Objects for scalable, data-driven architecture
- Led a 2-person co-op development team, delegating tasks and maintaining a consistent code structure across the project

Junior QA Engineer (Internship) | Jul – Aug 2023

IGG Inc. (I Got Game)

- Tested game builds, documented and triaged bugs, and worked with developers to verify fixes before milestones

Teaching Assistant | Dec 2022 – Jul 2023

IGA Institution for Game Portfolio

- Assisted students with Unity and programming, and wrote game design articles for social media

PROJECTS

Tool Developer | Apr 2026

VFX Adjustment Tool (Game Project)

- Built a Unity editor tool that streamlined the art asset pipeline, cutting manual iteration work for the team

Game Developer | Dec 2025

What the Fridge (Game Project)

- Sole programmer, building all core systems in Unity including player controller, inventory, interactions, and UI

Enemy Designer & Developer | Dec 2024 – May 2025

Runekinetik (Game Project)

- Designed enemy archetypes, scripted AI state machines, and balanced encounter pacing

Solo Developer (All Roles) | Sep 2023 – Jan 2024

Squishy Squid (Solo Project)

- Handled full production: concept, level design, programming, art, and QA
